

Introduction:-

No electric power supply is required to operate this lift. You require a Pneumatic pressure from a compressor. Its working is simple as such no maintenance required for it.

Specifications:-

Type	Pneumatic Scissor Type
Frame	Rectangular tube L x W =1950mm x 555mm
Top Frame	Rectangular tube L x W = 1950mm x 555mm
Min. Closing Height	230mm
Max. Opening Height	740mm
Paint	Powder Coated
Wheel Clamp	Optional if required
Top	MS Sheet (Plain), Powder Coated or SS Sheet
Power	Compressed Air Pressure 9 Kg/cm ²
Operation	Wall fit Hand lever valve/Foot valve for up & down
Safety Locking	Manual locking
Lifting Capacity	One Bike (approx 200 kg)
Installation	On Floor or in trench
Weight	120 Kg. Approx
